Technical Data Sheet

STRUKTOL® J 650
Antifoam agent (technical processing aid)

Chemical Composition
Polyalcohols on basis of polyoxyethylene- polyoxypropylene-blockcopolymers

Properties
Appearance clear to slightly turbid liquid
Odour neutral
Density 1015 kg/m³ at 20 °C
Viscosity 765 mPa.s at 25 °C
Flash point >150 °C
Solidification Point -25 °C
Toxicological behaviour for details please see the currently valid material-safety-data-sheet
Ecological behaviour for details please see the currently valid material-safety-data-sheet
Storage stability at least 1 year at adequate storage

The data given are typical values which are not intended for use in preparing specifications. For test methods refer to the corresponding supplement.
Recommendations for application

The most favourable dosage quantity and the best adding point for STRUKTOL® J 650 depend on plant conditions and have to be found out by trials.

The suggestions for application and usage of our products as well as possible proposed formulations are meant to advise only to the best of our knowledge. This information is without obligation and does not release customers from their own testings to ensure suitability for intended processes and use. Liability is only accepted in case of intention or gross negligence. Liability for any defects caused by minor negligence are not accepted. Each producer is responsible and liable to observe legislation and patent rights of third parties.
